	Brisbane State High School	
	Student name: Kavii Sompura	**Student number: 165**
	Teacher name: Ms Preston	
	Date handed out: 2 Feb 2026	**Date due: 23 March 2026**

Subject	Visual Art
Technique	Reverse Chronology Investigation (20%)
Unit	Unit 1 – Art as Lens
Focus	Objects

Conditions			
Duration	7 weeks		
Mode	Written report / multimodal presentation	**Length**	2000 words/up to 10 minutes
Individual/ group	Individual	**Other**	• Visual support, including relevant annotated artworks, images, diagrams and/or experimental representations • Experimental artworks are included to support individual interpretation of researched art practices
Resources available	Resources will be made available in class and through QLearn Course online.		

Context

Unit 1 explores the concept of 'Art as Lens' through **contemporary** and **personal** contexts. This investigation provides opportunities for you to explore how artists apply different lenses to create new ways of communicating.

As an artist, you will consider how different lenses can change the meaning of **objects** to communicate **a personal viewpoint.**

As audience, you will consider your own connections to the object's artists use, and how artists challenge audience perspectives by applying different lenses.

Task

Investigate the following inquiry question through making and responding:
How do artists represent and manipulate objects in artworks to express personal viewpoints?

- Investigate the art practice of two artists who use objects to communicate viewpoints. Select:
  - **one** contemporary artist from QAGOMA and
  - **one** other artist from either a different time and/or place using the reverse chronology approach. Use this artist to provide further evidence to support your response. They should link to the contemporary artist through subject matter, media, art practice, direct influence or the ideas communicated to audiences

- Making: Investigate ideas, media and approaches generated in experimental artworks that express a personal viewpoint through the representation and manipulation of objects.

- Responding: Present your investigation in a written report/multimodal report that communicates:
    - analysis and interpretation of the work of the selected artists, and your experimental artworks
    - evaluation and justification of your research and experimentation in response to the inquiry question

Assessment objectives:

1. **implement** ideas and representations to generate individual solutions for the depiction of the material world
2. **apply** literacy skills to communicate understanding of visual language, expression and meaning in the work of self and others
3. **analyse** and interpret art practices through the personal and contemporary context
4. **evaluate** influences to explore diverse figurative and non-figurative representations of the material world
5. **justify** representations of artists' personal viewpoints
6. **experiment** in response to artists' contemporary representations of objects
7. **create** visual responses using knowledge and understanding of a range of 2 dimensional, 3 dimensional and/or time-based media
8. **realise** responses to communicate meaning through multiple viewpoints

Checkpoints

☐ Week 3: A variety of artist inspired experiments and a reflection on one experiment

☐ Week 4: Identify initial response to the inquiry question and 2nd artist

☐ Week 5: DRAFT - Written report/multimodal presentation into QLearn on the contemporary artist

☐ Week 6: A variety of 2nd artist inspired experiments and a reflection on one experiment

Authentication strategies

- Students will each produce a unique response by selecting artists, artworks, and approaches to investigate
- Students will provide documentation of their progress at indicated checkpoints
- The teacher will consult with each student as they develop the response
- Students must acknowledge all sources
- Students must submit final report to QLEARN

Criteria	Marks allocated	Result
Developing — generating solutions Assessment objective 1	5	
Researching — reacting to stimulus Assessment objectives 3, 6	7	
Reflecting — considering ideas and information Assessment objectives 4, 5	4	
Resolving — communicating as artist and audience Assessment objectives 2, 8	4	
Total	20	

Developing – generating solutions	
The student work has the following characteristics:	Marks

• implementation of a complex investigation informed by
  ○ constructed knowledge
  ○ individualised solutions
	4-5

• implementation of an investigation that generates exploration of diverse and relevant solutions	3
• implementation of ideas through an inquiry to investigate how artists communicate viewpoints	2
• implementation of an inquiry that generates visual responses	1
• does not satisfy any of the descriptors above	0

Researching — reacting to stimulus	
The student work has the following characteristics:	Marks
• analysis and interpretation that emphasises individualised reactions to the artists practice, and the interrelationships and understanding of art practices of self and others • experimentation and exploitation of visual forms and media that demonstrates synthesis of using new knowledge and understanding informed by the inquiry	6-7

• analysis and interpretation of
  ○ literal and non-literal meaning in work of self and others
  ○ the ways personal and contemporary contexts shapes the inquiry
• experimentation using insights informed by research of key artists and relevant practice, and exploration of processes
	4-5

• analysis and interpretation of artists' works
  ○ through the personal or contemporary contexts
  ○ in response to the inquiry question
• experiment in response to artists representations of new meaning though objects
	2-3

• interpretation of meaning and/or context in artworks • experimentation with media, ideas and/or information	1
• does not satisfy any of the descriptors above	0

Reflecting — considering ideas and information	
The student work has the following characteristics:	Marks
• evaluation of contemporary and/or historical influences and their impact on visual and intellectual inquiry • justification of visual inquiry supported by critical understanding strengths, implications and limitations of experimental approaches	3-4
• evaluation of the influences of relevant primary sources and secondary sources in the formulation of ideas • justification of viewpoints supported by ideas and information that assign new meaning to objects	2
• identification of relevant sources in the formulation of ideas • statement of opinions relevant to ideas	1
• does not satisfy any of the descriptors above	0

Resolving — communicating as artist and audience	
The student work has the following characteristics:	Marks
• application of literacy skills through articulated evidence that supports your response in a well-crafted investigation • realisation of responses that communicate artistic purpose and the interrelationships between art practices and intended meaning	3-4
• application of literacy skills using referencing, relevant visual art terminology and language conventions that recognise features of artworks and practices • realisation responses of visual, written or spoken responses to communicate meaning in response to artistic influences	2
• use of terminology to identify artworks • presentation of visual, written or spoken responses	1
• does not satisfy any of the descriptors above	0
